

3.5" Temperature Indicator

Description

This temperature indicator can be installed into a 3.5" bay of your PC. Via heat sensors on the heat sink of the CPU and the HDD, the indicator will display the CPU and hard disk drive temperature. This device will warn you by blinking if the temperature is higher than usual.

Ref. 61659

EAN 4043619616596

Specification

- Fits into 3,5" bay
- Switchable Celsius and Fahrenheit
- With LED backlight
- Display blinks, as soon as the temperature is higher than setting value
- Setting default value: CPU 65° C / 149 F and HDD 55° C / 131 F
- Maximum temperature indication 90° C
- Input Voltage: DC 5V
- Input Current: 0.05 A

System requirement

- PC with one free 3.5" bay

Package content

- 3,5" Thermometer
- Connecting cable
- Sticker
- User manual

Package

- Retail box
